SECTION-D

Case Based Questions:

19. Read the case/source given and answer the following questions.

The Northern Plains of India are spread between the Himalayas and the Deccan Plateau. Rivers like Ganga, Yamuna, and Brahmaputra bring rich alluvial soil that makes the plains very fertile. Because the soil is fertile, farmers grow lots of crops here. Many people live in this area and work as farmers or in other jobs. The Northern Plains are important for agriculture and support millions of people.

- | | |
|--|---|
| I. Name the type of soil found in the Northern Plains. | 1 |
| II. Why are the Northern Plains fertile? | 1 |
| III. What is one main occupation of people in this region? | 1 |
| IV. Give one reason why many people live here. | 1 |

20. Read the case/source given and answer the following questions.

History helps us learn about people and events that happened long ago. To study the past easily, historians divide time into different periods. These periods are groups of many years that share similar features. In our history, there are three major periods — the Ancient Period, the Medieval Period, and the Modern Period. The ancient period is very old, the medieval period comes after the ancient, and the modern period includes more recent history. By dividing history into periods, we can understand how life changed over time.

- | | |
|--|---|
| I. What is the study of the past called? | 1 |
| II. Why do historians divide history into periods? | 1 |
| III. Which period is the most recent? | 1 |
| IV. Name the three major periods of history. | 1 |
