OR

Identify the image given below and write about it in detail.

SECTION-E

Q9. Case Study Question

4

The climate of the place is affected by its distance from the Equator. The places near the Equator are much hotter because they receive more sunlight than places situated at higher latitudes. The Sun's rays falling on the Equator are vertical and spread over a small area. Hence, the equatorial regions experience a hot and humid climate.

Questions:

1. Which is the primary factor influences the climate of the place? 1
2. Which places are much hotter and why? 1
3. Why did the equatorial regions experience a hot and humid climate? 2

SECTION-F

Q9. Locate and label the following places on the given political map of India. (1×3=3)
