

CLASS: V
Date: 02/08 /2024
Admission No: _____

Time: 1Hour
Max. Marks: 25
Roll No: _____

Q.1. Choose the correct answer and fill in the blanks: (1×4=04)

1. _____ is a major cause of soil pollution. 1
 a. Excessive use of fertilizers b. Bursting of crackers c. Oil spill d. Honking of cars
2. _____ is the process in which people move to cities and towns to live and work instead of the countryside. 1
 a. Industrialisation b. Urbanisation c. Colonisation d. None of these
3. _____ waste that does not mix with the soil and harms the environment. 1
 a. Biodegradable b. Non-biodegradable c. Organic d. All of these
4. Place the correct name into the box from the options given below. 1

Renewable	Non-renewable
_____?	Coal

- a. Forests b. Petroleum c. Natural Gas d. All of these

Q.2. Very short answer questions: (2×3=06)

1. Write any two ways in which water pollution can be avoided. 2
2. How do environmental problems affect people's health? 2
3. What do you see in the picture? Which source of energy is it? 2

Q. 3. Short answer questions: (2×3=06)

1. What effect do human activities have on natural resources? 3
2. Which type of pollution is shown in the picture? Think of two ways in which this type of pollution can be reduced? 3

Q.4. Long answer question:

(1×5=05)

1. What are some things we can do to prevent further pollution on our Earth? Give specific examples and explain why they would be good for our environment. 5

Q.5. Case Based Questions:

(1×4=04)

Read the case/source given and answer the following questions

Things that we use in our daily life are derived from natural resources. Some resources can be used directly, while some need to be changed from their natural form before they can be used. Water can be used directly. It is used to produce hydroelectricity. This is done by building dams across rivers. Fossil fuels need to be refined before they can be used. Petrol, kerosene and diesel are obtained from fossil fuels. Even mineral need to be separated from their ore before they can be used.

The increase in population has increased the demand for natural resources. So, there is a need to look for new resources. This would help us to conserve fossil fuels.

- 1. Name any four resources which are directly used. 1
- 2. Why has the demand for resources been increased? 1
- 3. Which minerals are obtained from fossil fuels? 1
- 4. How can we conserve fossil fuels? 1
