b) Write any three difference between Hardware and Software.

Ans:

Hardware	Software
Physical components of computer	Set of programs that tells computer what to do
It can be seen and touched	It cannot be touched
These wear out with time	These does not wear out with time, but gets out-dated
It is divided into input devices and output devices	It is mainly divided into system software and application software
Eg. : RAM, ROM, Monitor, CPU, Mouse, Keyboards	Eg. : Paint, Word, Excel, PowerPoint. Wordpad

c) What is Software? Mention it's two types.

Ans: Software is the set of instructions stored on a disk drives that tell the hardware what to do and how to do.

There are two types of software :

(1) System software and

(2) Application software

(1) System Software : It is the software which acts like a middleman between the user and the computer system.

(2) Application Software : The software that helps us to do specific type of work is called Application Software.
