8. Distinguish between a Joint Family and a Nuclear Family with three points. 3

SECTION-D

9. Describe the necessity of Oceans.

5

OR

Write about Asian Continent in detail..

SECTION-E

10. Case Study

Read the following passage and answer the questions that follow:

Earth is known as the "Blue Planet" because over 70% of its surface is covered by vast bodies of saltwater called oceans. These oceans interact constantly with the massive landmasses known as continents. The interactions between these landforms and water bodies determine global climate patterns, resource availability, and human migration paths. For centuries, communities built along coastlines depended heavily on maritime trade and marine resources for survival. Understanding the geographic distribution of continents like Asia and oceans like the Indian Ocean helps us comprehend how natural barriers shaped ancient human settlements.

- | | |
|--|---|
| 1. Explain why Earth is referred to as the "Blue Planet" in the text. | 1 |
| 2. According to the passage, what did ancient coastal communities depend on? | 1 |
| 3. Why oceans are important? | 2 |
