SECTION-E

9. Case Study:-

The Indian Ocean Tsunamis of 2004 was one of the deadliest disasters in history. It was caused by a powerful earthquake under the Ocean. The earthquake led to huge waves that spread across the Indian Ocean, hitting countries like Indonesia, India, Sri Lanka, Thailand and many more.

The wave's flooded towns destroyed homes and caused great loss of life and property. Many people lost their lives, and many others were left without homes. This disaster showed how powerful and dangerous tsunamis can be, especially for people living near the ocean. After the disaster, many countries worked together to create an early warning system called the Indian Ocean Tsunami Warning and Mitigation System.

1. Define Tsunami. 1
2. What is the Indian Ocean Tsunami Warning and Mitigation System? 1
3. How Tsunamis can be powerful? Explain. 2
