Choose any two long answer questions and write:

(8)

10. Why does India have government at three levels? Name them and explain.

Ans- India has government at three levels because it is a vast nation with twenty-eight states and eight union territories. It is very difficult for a single government to run the entire country. Hence, our Constitution has provided for three separate levels of government.

* Union government * State government * Local government

11. Which is the highest court of law in India? Where is it located?

Ans- There are various courts in India. The highest court of law in India is The Supreme Court of India. Which is in Delhi.

12. What are the difference between large-scale and small-scale industries?

Ans-Large-scale industries refer to the industries that require a huge amount of money to establish and employ thousands of people. Small-scale industries employ a smaller number of workers and are cheaper to establish compared to large-scale industries. In these industries, manufacturing of goods is done on a small-scale.

13. What are raw material? Explain.

Ans- Raw materials are the most important factors for the growth of any industry. Without raw materials, industries cannot produce anything. For example, if there would be no cotton plants, there would be no clothes for us to wear.
