SECTION B: SHORT QUESTIONS

II. Short Answer Questions.

4 x 2 = 8 Marks

13. Explain the meaning of <h1> to <h6> tags.

Ans- <h1> - Main Heading: Represents the most important heading on the page.
 <h2> - Subheading: Represents a secondary heading, used to structure content under the <h1> heading.

.....

.....

<h6> - Sixth-level Heading: Represents the least important heading level, typically used for minor subheadings.
14. Write a short notes on HTML.

Ans- HTML (Hypertext Markup Language) is the standard language used to create and structure content on the web. It defines the structure and layout of web pages by using a system of tags and attributes. HTML forms the backbone of most websites, allowing developers to organize text, images, links, forms, multimedia, and other elements in a browser-readable format.
15. Which three tags are used to create definition lists? Name and explain.

Ans- A **definition list** in HTML is used to display a list of terms and their corresponding definitions. It consists of three main tags: <dl>, <dt>, and <dd>.

`<dl>` (Definition List): The `<dl>` tag is used to create the overall container for a definition list. It holds the term and its definition pair.

`<dt>` (Definition Term): The `<dt>` tag is used to define a term or a name that is being described in the list. Each term in the list is placed inside a `<dt>` tag.

`<dd>` (Definition Description): The `<dd>` tag is used to describe or define the term specified in the `<dt>` tag. It provides the definition or explanation for the term.

16. Mention the attributes used in the `` and `` tags.

Ans- `` Defines the style of bullet points in an unordered list.

Values:

disc (default): A solid circle bullet.

circle: An empty circle bullet.

square: A square bullet.

`` Specifies the numbering style for the ordered list.

Values:

1: Numbers (1, 2, 3, ...).
